

## 2009 - 2010 Pricing Guidance

### Applicable from June 1st 2009

Following the announcement last month of the changes in the way organisations will be able to work with the Standard, a new pricing model has been developed to provide the same basis of approach across the English centres.

The new model replaces existing pricing guidance from CQL with effect from June 1st 2009, with all new assessment or review activity priced using this model. Any activity for which the price has already been agreed outside of this model will, of course, progress as planned.

All Investors in People Assessment and Review projects include the following within the package price:

- Planning Meeting and off-site planning activity
- On site evidence gathering including interviews
- Evidence and information analysis
- Assessment / Review Report
- Improvement Planning Meeting
- Annual support visit

The table below presents the package prices for Investors in People Assessments and Reviews with up to 6 additional evidence requirements beyond the core Standard.
